Response body

Enable Dynamic Response: ☐

```
1 {  
2   "Registro1": [  
3     {  
4       "atributo1": 1,  
5       "atributo2": 2,  
6       "atributo3": 3,  
7       "atributo4": 4,  
8       "atributo5": 5,  
9       "atributo6": 6,  
10      "atributo7": 7,  
11      "atributo8": 8  
12     }  
13   ],  
14   "Registro2": [  
15     {  
16       "atributo1": 9,  
17       "atributo2": 10,  
18       "atributo3": 11,  
19       "atributo4": 12,  
20       "atributo5": 13,  
21       "atributo6": 14,  
22       "atributo7": 15,  
23       "atributo8": 16  
24     }  
25   ],  
26 }
```

- Save and start your API.

Enable Request Logger ☐

Set response delay ☐ 1 in seconds

Save **Stopped** Cancel

Click to start the mock

- Acesse sua API.

REST MOCK

This mock is started on [https://demo9271967.mockable.io/endpoint\\_name](https://demo9271967.mockable.io/endpoint_name) and [http://demo9271967.mockable.io/endpoint\\_name](http://demo9271967.mockable.io/endpoint_name)

- Observe os resultados (Layout varia de acordo com navegador, ex: Firefox).
